Introduction To Edition 4 of
NCWM Publication No. 5
June 12, 1992

The listings in this publication include all Certificates of Conformance that have been issued from January 1, 1986 through June 12, 1992. Certificate of Conformance numbers are also included for all devices that have successfully completed type evaluation but for which the hard copy of the certificates have not yet been issued. These certificate listings are identified by an absence of a "Date" and by indicating "IN PROCESS" in the "Comments" column. The certificate numbers have been assigned based upon successful completion of the type evaluation.

Several suffix codes are used in conjunction with the basic certificate of conformance number which always remains the same. These codes are necessary to indicate special kinds of certificates and when changes are made to a certificate. These codes are explained below.

A Identifies an addendum to a certificate when changes are made to the certificate's contents. A number following the letter "A" designates the number of addenda that have been issued for the certificate. Inconsistencies of format exist in certificates generated over the years. Standard practice now dictates the addenda sequence as follows: xx-xxx, xx-xxxA1, xx-xxxA2, xx-xxxA3, etc.

P Identifies a provisional Certificate of Conformance. Provisional certificates are issued based on manufacturers' data when Participating Laboratories cannot fully test devices to insure compliance with Handbook 44. When the test capabilities become available, the devices covered by the provisional certificates are to be resubmitted to complete the type evaluation and to convert the provisional certificates to full Certificates of Conformance. The addenda sequence for provisional certificates is as follows: xx-xxxP, xx-xxxPA1, xx-xxxPA2, xx-xxxPA3, etc.

PN Identifies a Pre-NTEP certificate which has been issued under the NTEP policy of accepting results of type evaluation by individual State jurisdictions before the NTEP program was established. After a period of six months, if no information is received indicating the device does not comply with Handbook 44, the certificate is to be upgraded to a full certificate.

Amended - Corrections may be made to certificates to correct an error or for editorial purposes. In these cases the word "Amended" will follow the certificate number.

		The specific models of load cells covered by this certificate are identified by the capacity of each load represented.							
87-094A2	Artech Industries, Inc.		Load Cell	70210	III/III L	see below	see below		IN PROCESS
		Class III, M, n = 5,000, Capacity 5,000 to 50,000 lb Class III L, M, n = 10,000, Capacity 5,000 to 200,000 lb							
87-094P 01/27/88	Artech Industries, Inc.		Load Cell	70210	III/III L	5000 M	5000 to 50000 lb		Superseded by 87-094
		Capacities (lb) 5,000: 10,000: 20,000: 50,000							
90-032 04/25/90	Artech Industries, Inc.		Load Cell	SS30310 SERIES	III/III L	5k, 10k M	1,000 - 10,000 lb		SHEAR BEAM LOAD CELL
		Class III, single cell, n = 5,000. Class III L, single cell, n = 10,000. Capacity 1,000 to 10,000 lb. Other models: SS30210 and SS30310-xx-C/B							
90-032P 02/12/90	Artech Industries, Inc.		Load Cell	SS30310 Series	III/III L	5K,10K M	1,000 to 10,000lb		Superseded by 90-032
90-083 05/15/90	Artech Industries, Inc.		Load Cell	80210 Series	III L	10,000	20,000 - 200,000		Double Ended Shear Beam
		80310 - The difference between the Models 80210 and 80310 is in the manner of contact of the load cell to the mounting assembly. The 80210 has a semicircular indentation in the middle of the bottom of the cell where the cell rests on a semicircular rod. The point of contact is the semicircular areas. The bottom of the 80310 is flat and the semicircular is turned upside down so the flat area is in contact with the load cell. The semicircular rod makes contact with a flat plate in its mounting assembly							
90-083.A1	Artech Industries Inc		Load Cell	80210 Series	III L	10,000	20,000 - 200,000		IN PROCESS

Description: The "Digital Motion Stabilzer" package is a digital filter software package for electronic digital indicators.									
91-024 02/01/91	Weigh-Tronix, Inc.		Indicating Elements	WI-190M	III	5000			Indicator Electronics
The Model WI-190M is the main electronics module that contains the analog to digital converter, microprocessor controller, and calibration storage.									
91-062 04/15/91	Weigh-Tronix, Inc.		Indicating Elements	WI-114	III/III L	10,000			Digital Electronic
The WI-114 is a weight display that sums the weight values from up to 3 separate Model WI-110 weight indicating elements. It is intended to be used on a vehicle scale with up to 3 individual weighing elements to provide axle-load weights plus the gross weight of the vehicle to comprise a single weighing system.

		Class III, single cell, n = 5,000. Class III L, single cell, n = 10,000. Capacity 1,000 to 10,000 lb. Other models: SS30210 and SS30310-xx-C/B							
90-032P 02/12/90	Artech Industries, Inc.		Load Cell	SS30310 Series	III/III L	5K,10K M	1,000 to 10,000lb		Superseded by 90-032
90-083 05/15/90	Artech Industries, Inc.		Load Cell	80210 Series	III L	10,000	20,000 - 200,000		Double Ended Shear Beam
		80310 - The difference between the Models 80210 and 80310 is in the manner of contact of the load cell to the mounting assembly. The 80210 has a semicircular indentation in the middle of the bottom of the cell where the cell rests on a semicircular rod. The point of contact is the semicircular areas. The bottom of the 80310 is flat and the semicircular is turned upside down so the flat area is in contact with the load cell. The semicircular rod makes contact with a flat plate in its mounting assembly

89-071 Amended 03/07/91	Cardinal/Detecto Scale Mfgr. Co.	Load Cell	SCD & SCD-C	III L	MC: 10,000	50k to 100k lb	Column, Digital Output
	The specific load cells in this family covered by this certificate are identified by the model number which includes the load cell capacity as a prefix to the SCD or SCD-C indentification. The only difference b/t the SCD & the SCD-C load cells is that the SCD-C has a connector rather than the cable being attached directly to the load cell. Models: 50K-SCD, 100K-SCD, 50K-SCD-C & 100-SCD-C.

89-071 Amended 03/07/91	Cardinal/Detecto Scale Mfgr. Co.	Load Cell	SCD & SCD-C	III L	MC: 10,000	50k to 100k lb		Column, Digital Output
	The specific load cells in this family covered by this certificate are identified by the model number which includes the load cell capacity as a prefix to the SCD or SCD-C indentification. The only difference b/t the SCD & the SCD-C load cells is that the SCD-C has a connector rather than the cable being attached directly to the load cell. Models: 50K-SCD, 100K-SCD, 50K-SCD-C & 100-SCD-C.

90-083 05/15/90	Artech Industries, Inc.	Load Cell	80210 Series	III L	10,000	20,000 - 200,000		Double Ended Shear Beam
	80310 - The difference between the Models 80210 and 80310 is in the manner of contact of the load cell to the mounting assembly. The 80210 has a semicircular indentation in the middle of the bottom of the cell where the cell rests on a semicircular rod. The point of contact is the semicircular areas. The bottom of the 80310 is flat and the semicircular is turned upside down so the flat area is in contact with the load cell. The semicircular rod makes contact with a flat plate in its mounting assembly

U.S. DEPARTMENT OF COMMERCE
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

BIBLIOGRAPHIC DATA SHEET

1. PUBLICATION OR REPORT NUMBER
NISTIR 4862

2. PERFORMING ORGANIZATION REPORT NUMBER

3. PUBLICATION DATE
June 12, 1992

4. TITLE AND SUBTITLE

NCWM Publication 5
National Type Evaluation Program Index of Device Evaluation, Fourth Edition

5. AUTHOR(S)

Richard Whipple

6. PERFORMING ORGANIZATION (IF JOINT OR OTHER THAN NIST, SEE INSTRUCTIONS)

U.S. DEPARTMENT OF COMMERCE
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY
GAITHERSBURG, MD 20899

7. CONTRACT/GRANT NUMBER

8. TYPE OF REPORT AND PERIOD COVERED

9. SPONSORING ORGANIZATION NAME AND COMPLETE ADDRESS (STREET, CITY, STATE, ZIP)

10. SUPPLEMENTARY NOTES

[ ] DOCUMENT DESCRIBES A COMPUTER PROGRAM; SF-185, FIPS SOFTWARE SUMMARY, IS ATTACHED.

11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

This publication contains the listing of all devices that have been evaluated under the National Type Evaluation Program (NTEP) from January 1, 1968 to June 12, 1992. It replaces all previous editions and supplements.

12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)

National Type Evaluation Program

13. AVAILABILITY

[ ] UNLIMITED

[X] FOR OFFICIAL DISTRIBUTION. DO NOT RELEASE TO NATIONAL TECHNICAL INFORMATION SERVICE (NTIS).

[ ] ORDER FROM SUPERINTENDENT OF DOCUMENTS, U.S. GOVERNMENT PRINTING OFFICE, WASHINGTON, DC 20402.
